

granite MEDSYSTEMS

July 20, 2011

### **Granite MEDSystems Has Expanded its North American Facility**

Granite MEDSystems has completed the latest expansion of its North American design and manufacturing facility to accommodate continued growth and simplify manufacturing of larger, more complex medical assemblies.

The expansion, which was completed in July 2011, means many good things, including;

- **More than twice the manufacturing capacity in North America**
- **The ability to build more large cart and cabinet assemblies**
- **Opportunity to create extremely lean flow for efficiency**

Granite MEDSystems is a global provider of complete, turnkey electro-mechanical solutions exclusively for the medical OEM. With [ISO 13485 certified](#) facilities in North America and Asia, we're equipped to service facilities anywhere in the world. Our in-house expertise in the design and manufacturing of [mechanical assemblies](#), [embedded computers](#), and [electronic circuit boards](#) result in extremely reliable products with controlled lifecycles. Granite has long been a trusted partner of many global tier-one medical OEMs, including Philips, GE, Siemens, Abbott and many more.
